A Keyboard Macro enables you to set a keyboard shortcut to a command or application. You can create keyboard macros with a macro editor or directly via the Keyboard Menu. When you create a macro, you can set it to run the next time you press the key you selected. If you wish, you can have the macro run immediately after you select the key.

MACRO Features:

- Create multiple macros - create more than one macro to make your work even easier
- Select the keys you want to activate - set a range of keys to run the macro
- Set your own shortcut - set a shortcut to run the macro you just created
- Add and delete keyboard shortcuts - add and delete shortcut keys. All shortcuts are located on the context menu
- Create keyboard shortcuts - create your own keyboard shortcuts
- Create and manage macros - create macros from keyboard shortcuts

Keyboard Manager Features:

- Add a key combination to the existing keyboard shortcuts
- Add more key combinations by using the Add key combination button
- Use modifier keys to access your macro - Alt, Win, Ctrl
- Edit keyboard shortcuts - modify existing keyboard shortcuts
- Use a different keyboard - assign a different keyboard to run macros
- Identify which key was pressed in the shortcut dialog - shows the key pressed and which key was pressed
- Built-in macro editor - save macros in an easy to use editor
- Review key combinations - see all the current and previous key combinations
- View key combinations - see all the key combinations and their shortcut keys
- Import/export key

combinations - export/import all the key combinations
Keyboard Settings Features: Assign a modifier key to create a key combination - to use it, hold down the modifier key while pressing the key
Switch keyboard layouts - select the keyboard layout for the macro
Change shortcut keys - change shortcut keys
Set the keyboard to trigger your macro - on what keyboard combination your macro runs
JIDEO PCALC PCALC is a program that is used to find the date and time, the day of the week, the month and the year. It also calculates the day of the week of a specific date. It uses your computer clock to know the current date and time. It has a calendar, a clock and a reminder. It has a clock with an analogue and digital clock. The alarm clock displays the current time. You can set it to remind you of a specific time.
WORD TRAINING GAME
This is a very simple, addictive word game. You are given a certain word and you have
